

TITLE OF INVENTION

ICE BREAKER MAT

BACKGROUND OF THE INVENTION

THIS INVENTION IS DIRECTED TO A MEANS OF PROVIDING A SAFER MEANS OF REMEDYING THE PROBLEM OF ACCUMULATED ICE, AND OTHER SLIPPERY HAZARDS ON EXTERIOR STAIRS. THIS IS ACCOMPLISHED BY THIS INVENTION WHICH CONSISTS OF AN INNER CORE MATERIAL WHICH IS FLEXIBLE, AND AN OUTER COVER WHICH IS BOTH SLIP RESISTANT AND WATER PROOF. THE RESULTS BEING A PRODUCT WHICH WILL NOT SUPPORT ICE OR ALLOW ICE TO ADHERE TO THE COVER MATERIAL.

A VARIETY OF STEP PADS AND MATS HAVE BEEN DEVELOPED TO PERFORM A VARIETY OF FUNCTIONS, FOR EXAMPLE,

CROSS REFERENCE TO RELATED APPLICATIONS

U.S. PAT. NO. 4060947 TO NAKA

U.S. PAT. NO. 5357724 TO SONODA

U.S. PAT. NO. 5898814 TO YAMAMOTO

U.S. PAT NO. 6088976 TO ROY

ALL OF WHICH ARE ILLUSTRATIVE OF PRIOR ART. WHILE THESE PRODUCTS ARE GENERALLY SUITABLE FOR THEIR PARTICULAR PURPOSE, AS THEY ARE DESCRIBED THEY ARE NOT SUITABLE FOR THE PURPOSE OF THIS INVENTION.

U.S. PAT. NO. 4060947

FLEXIBLE NON-SKID STRIP WITH REINFORCING WEB MEMBER

HIROMITSU NAKA, SHINMACHI OAZA, SAITAMA J.A. YASHIO

A FLEXIBLE NON-SKID STRIP IS CONSTITUTED BY A MAIN BODY EXTENDING ALONG THE LENGTH OF THE STRIP AND ADAPTED TO BE SECURED TO THE TREAD PORTION OF A STAIR.

U.S. PAT. NO. 5357724

STAIR TREAD

MUNEKATSU SONODA

A STAIR TREAD, IN WHICH SYNTHETIC RUBBER IS USED TO ENCASE METAL SIDE CORE PORTIONS ARRANGED AT THE SIDE EDGES OF A SUBSTANTIALLY HORIZONTAL CORE SECTION AT A DOWNWARD RIGHT-ANGLE THERETO.

U.S. PAT. NO. 5898814

ANTI-SKID STAIR COVERING WITH ILLUMINATING AREAS THEREIN

ISAO YAMAMOTO, KASHIWARE-SJI OHGATA

A STAIR COVERING WHICH PRESENTS A STAIRS ANTISKID MEMBER CAPABLE OF REDUCING THE THICKNESS OF THE ENTIRE ANTISKID MEMBER, ENHANCING THE VISUAL RECOGNITION OF STAIRS BY LIGHT.

U.S. PAT. NO. 6088976

REMOVABLE NON-SKID STEP PAD

GILLIS ROY

THE REMOVABLE NON-SKID PAD COVERS A PORTION OF A CORRESPONDING STEP OF AN EXTERIOR STAIR SO AS TO ALLOW PEOPLE TO USE IT MORE SAFELY. ANY SNOW OR ICE ACCUMULATIONS MAY BE EASILY DISLODGED BY REMOVING THE PAD AND SKATING IT.

BRIEF SUMMARY OF THE INVENTION

IT IS THE OBJECT OF THIS INVENTION TO PROVIDE A SIMPLE AND CONVENIENT WAY TO REDUCE THE HAZARD OF ICE ACCUMULATING ON EXTERIOR STAIRS, THEREBY REDUCING THE POSSIBILITY OF BODILY INJURY CAUSED BY SLIPPING AND FALLING ON ICY STAIRS.

DETAILED DESCRIPTION OF THE INVENTION

THE COVER MATERIAL OF THIS INVENTION IS MADE OF PVC IMITATION LEATHER AND IS MADE OF KNIT CLOTH, ADHESIVE-BONDED AND CHEMICAL FABRIC AS BASIC MATERIALS AND COATED WITH PVC MATERIAL AFTER PRESSING AND FOAMING. IT IS ANTI LOW TEMPERATURE AND AGING, AND HAS A LONG DURATION. PVC IMITATION LEATHER HAS REACHED THE NATIONAL STANDARD OF GB/T8948-94. IT IS MADE FOR EXTERIOR USE, IS WATERPROOF, AND IS TEXTURED TO PRODUCE A NON-SLIP SURFACE.

THE CORE IS 1/4" STYROFOAM OR IT'S EQUIVALENT, AND MEASURES 8" X 34", AND IS COATED WITH AN ADHESIVE PRIOR TO BEING ASSEMBLED WITH THE COVER MATERIAL. THIS CREATES A STABLE STAIR MAT WITH NO MOVING PARTS. ONCE THE COVER AND CORE ARE ASSEMBLED, THE RIGHT, BACK, AND LEFT SIDE ARE SEALED FOR A PERMANENT SEAL, WHICH MAKES THE MAT AIR AND WATER TIGHT. AS LONG AS THE SEAL IS NOT BROKEN, IT WILL RETAIN IT'S FLEXIBILITY AND PERFORM AS INTENDED.

THE MAT IS THAN PLACED ON A WOODEN STEP IN LATE FALL BEFORE THE THREAT OF ICE AND SNOW. IT IS SECURED BY STAPLES, TWO SIDED TAPE, VELCRO, OR ANY OTHER MEANS THE BUYER WISHES TO ATTACH THEM WITH, IF THE APPLICATION IS ON BRICK OR CONCRETE STAIRS THAN THEY CAN BE ATTACHED BY FOUR DABS OF SILICONE SEALER OR A LIKE MATERIAL WHICH WILL SECURE THE MAT FOR THE DURATION OF THE WINTER. THE MAT IS PLACED APPROX. 1/2" IN FROM THE FRONT EDGE OF THE STEP WITH THE ROUNDED EDGE TO THE FRONT, THAN PLACING TWO STAPLES ON BOTH ENDS AND THE BACK ON THE SEALED PART OF THE MAT.

ONCE ICE HAS FORMED, IT ONLY REQUIRES THE WEIGHT OF YOUR BODY AS YOU STEP ON THE MAT TO BREAK THE ICE, AND WITH LITTLE EFFORT WITH YOUR FOOT, THE ICE WILL FALL FROM THE MAT, SINCE THE COVER FABRIC ALSO HAS A NON-ADHERING QUALITY, THEREFOR THE ICE WILL NOT STICK TO THE SURFACE.
